Popis

Because of the threat of plague in 1709 abbot Vejmluva initiated creating of so called "Down Cemetary" situated northwards from the monastery and far from the city Žďár. The structure of the building reflects the symbol of the Holly Trinity, symbolised by three chapels on the tops of an imaginary triangel ground plan of the cementary, which perimeter walls were lead on the ground plan on the bases of a curve. In the central part a statue of an Angel of the Last Court by Řehoř They šas raised around 1730. In 1755 bishop Benard Hennem enlarged the cemetary and created the fourth chapel, still in the spirit of Santini architecture.
